ANDERSON POWER PRODUCTS® OFFERS HIGH PERFORMANCE POWER CLIP

Anderson Power Products® (APP), a leader in power interconnect solutions, offers the Power Clip electrical power connector. Designed as a low cost interconnection between two perpendicular power bus bars, the Power Clip is used in “N+1” rectifier, power supply and switching power supply applications.

The high-performance contact of APP’s Power Clip provides low-voltage drop and superior amperage carrying capability. Because the clip accepts a solid .125” thick nickel or gold plated rectangular bus bar tab, there is no need for a mating connector.

The Power Clip has been evaluated to UL1977 and CSA standard C22.2 No. 182.3-M1987 and is rated for up to 300 amps of continuous service. The product is also UL approved for true hot plug current interruption of 100A at 48V and 200A at 42V using a gold bus bar tab.

About Anderson Power Products

Anderson Power Products is a leader in developing high quality, low cost, power interconnect solutions for several industries, including: Back Up Power Systems, Electrical Recreational Vehicles, UPS Systems, Telecommunications and High-Technology Devices. Headquartered in Sterling, MA, Anderson Power Product’s facility is ISO 9001:2000 certified and uses automated manufacturing to offer uncompromising quality. In addition, APP operates a manufacturing and assembly facility in Fermoy, Ireland to provide support for their European customers, as well as three Asia Pacific facilities: Shenzhen, China, Shatin Hong Kong and Taichung City 407, Taiwan (R.O.C.).

APP connectors are available through their authorized distributor network or direct from the factory. For further information about the company and its products, call 978-422 3600 or visit their web site at www.andersonpower.com.
