

Saf-D-Grid®

Max

Source

Load

Features & Benefits

- **Higher Current Rating**
Provides up to 55A (North America) and 63A (Rest of the World) of current up to 600V
- **Small Footprint**
Saf-D-Grid Max is equivalent in size to an IEC C19
- **Rated for Current Interrupt**
Minimum of 40A at 305V (UL)
- **Protected from Accidental Disconnects**
Active latch system provides secure connections
- **Touch-Safe Plugs & Receptacles**
Passes UL and IEC finger probe (plug and receptacle)
- **Unique Mechanical Keys & Color-Coded Housings**
Input and output application specific for ease of use and accident prevention
- **Robust Panel Retention Design**
Prevents receptacle pull-out

Application

- Information & Communication Technology (ICT) Equipment
- Power Supply Unit (PSU)
- Network Switch Power Supply
- Server Power Supply
- Power Distribution Unit (PDU)
